PACKAGES AND OPTIONS

EXTERIOR

The 1964.5-1966 Mustang is arguably one of the most distinctive and attractive cars on the planet. Even after more than 50 years, it still looks fresh from any angle. It would be presumptuous of us to tinker with this formula, so our exterior appearance options are quite subtle. Instead, we have concentrated on improving the performance, reliability, quality and craftsmanship of the vehicle while retaining the classic styling that made it an American icon.

① **COLOR**

The Revology paint process consists of an epoxy primer, urethane primer, basecoat, and clearcoat. We use exclusively Glasurit automotive paint finishes for the ultimate in appearance and durability

SAFETY AND SECURITY

Modern vehicles are designed to meet passive safety standards that did not exist when the original Mustang entered the market. Although it is impossible to meet current safety standards with a vehicle based on a 1960s design, Revology endeavors to enhance safety as much as possible within the constraints of the vehicle platform. Standard safety features include driver and passenger three-point seat belts, a dual-circuit braking system, a collapsible steering column shaft, a fuel pump inertia switch, and a 16 gauge steel trunk floor, none of which were available on the original Mustang. Theft protection is enhanced via a rolling code encrypted ignition switch. Optional safety features are listed below.

⑭ RESTRAINT SYSTEMS

- FRONT SEAT HEAD RESTRAINTS \$ 800
Adjustable front seat head restraints, covered in matching leather or vinyl

FUNCTIONAL

Revology vehicles are designed to be fast, reliable, comfortable, and above all, fun to drive. We have worked very hard to develop a vehicle that artfully balances acceleration, braking, steering, and ride quality. Although the Revology Mustang is designed for street use, much like a modern performance car it is suitable for track use with minimal modifications.

⑮ EXHAUST
