PACKAGES AND OPTIONS

EXTERIOR

By 1968, the muscle car wars were in full swing in the USA. Changes for the 1968 Mustang lineup included new powertrains and updates to meet new safety regulations, but styling was mostly carryover from 1967. The 1968 Mustang received a boost from its appearance in the Warner Bros. film, "Bullitt" starring Steve McQueen. The Revology 1968 Mustang GT applies our proven formula of combining modern performance, quality and craftsmanship with classic styling and character.

- ① **COLOR**

SAFETY AND SECURITY

Modern vehicles are designed to meet passive safety standards that did not exist when the original Mustang entered the market. Although it is impossible to meet current safety standards with a vehicle based on a 1960s design, Revology endeavors to enhance safety as much as possible within the constraints of the vehicle platform. Standard safety features include driver and passenger three-point seat belts, a dual-circuit braking system, a collapsible steering column shaft, a fuel pump inertia switch, and a 16 gauge steel trunk floor, none of which were available on the original Mustang. Theft protection is enhanced via a rolling code encrypted ignition switch. Optional safety features are listed below.

14 RESTRAINT SYSTEMS

- | | | |
|--------------------------|--|--------|
| <input type="checkbox"/> | FRONT SEAT HEAD RESTRAINTS | \$ 800 |
| | <i>Adjustable front seat head restraints, covered in matching leather or vinyl</i> | |

FUNCTIONAL

Revology vehicles are designed to be fast, reliable, comfortable, and above all, fun to drive. We have worked very hard to develop a vehicle that artfully balances acceleration, braking, steering, and ride quality. Although the Revology Mustang is designed for street use, much like a modern performance car it is suitable for track use with minimal modifications.

15 EXHAUST
