**EXTERIOR**

The GT500 was Shelby's top of the line offering in 1967, and it looked the part. A new front fascia, grille, hood, decklid with integrated spoiler, and upper and lower quarter scoops took the muscular Mustang redesign a step further. More colors and options were made available, broadening the car's appeal. The 600HP supercharged engine in the Revology GT500 pays homage to the 428ci big block, which at the time was the most powerful engine ever in a Mustang.

**SAFETY AND SECURITY**

Modern vehicles are designed to meet passive safety standards that did not exist when the original Mustang entered the market. Although it is impossible to meet current safety standards with a vehicle based on a 1960s design, Revology endeavors to enhance safety as much as possible within the constraints of the vehicle platform. Standard safety features include driver and passenger three-point seat belts, a dual-circuit braking system, a collapsible steering column shaft, a fuel pump inertia switch, and a 16 gauge steel trunk floor, none of which were available on the original Mustang. Theft protection is enhanced via a rolling code encrypted ignition switch. Optional safety features are listed below.

⑬ RESTRAINT SYSTEMS

- FRONT SEAT HEAD RESTRAINTS \$ 825  
*Adjustable front seat head restraints, covered in matching leather or vinyl*

**FUNCTIONAL**

Revology vehicles are designed to be fast, reliable, comfortable, and above all, fun to drive. We have worked very hard to develop a vehicle that artfully balances acceleration, braking, steering, and ride quality. Although they are designed primarily for street use, they are suitable for track use with minimal modifications.
