PACKAGES

<input type="checkbox"/>	SUPER SNAKE™ PACKAGE <i>The 1967 Shelby GT500 Super Snake was a prototype vehicle developed by Shelby American for Goodyear to promote its new Thunderbolt tire. The Super Snake featured a 600hp Ford 427 SOHC racing engine, similar to the one that powered the LeMans-winning GT40s to victory that year. Shelby considered building a limited run of 50 Super Snakes, but the high cost of the racing engine made the project infeasible. The sole example passed through various hands until it was sold at auction in 2019 for \$2.2 million; at the time, the highest price ever paid for a Mustang. The Revology Super Snake features a unique front grille with outboard driving lights and polished laser cut stainless steel surrounds, a louvered fiberglass hood, Super Snake badging, a special shift knob, and the iconic three center stripe layout</i>	\$ 10,950

LeMANS STRIPES

LeMans stripes were a dealer-installed option on the 1967 Shelby GTs. On Revology Shelby GTs, the stripes are laser-aligned and applied to the front fascia, hood, cowl, roof, trunk filler panel, decklid, taillamp panel, rear valance, and rear bumperettes. After base coat, three coats of gloss clear are applied, leaving no perceptible transition between stripe and body color
