

## RETAIL ORDER GUIDE - 2025 MODEL YEAR 1966 MUSTANG 2+2 FASTBACK

When most people think of Mustang, they think of the first generation Mustang, which was introduced at the New York World's Fair on April 17, 1964 and produced through the 1966 model year. The original Mustang was a sensation and it created an entirely new market segment, selling an unprecedented almost 1.3 million units during the initial 2.5 year period. The original Mustang was available in coupe, also referred to as hardtop, convertible, and fastback body styles. The fastback had the sportiest styling but was the least practical, so it is understandable that it was the least popular then and the most desirable now. There were minor appearance differences among the 1964.5, early 1965, late 1965, and 1966 models, so Revology has taken the best elements of each to create its first generation Mustang fastback.
